Foto storiche

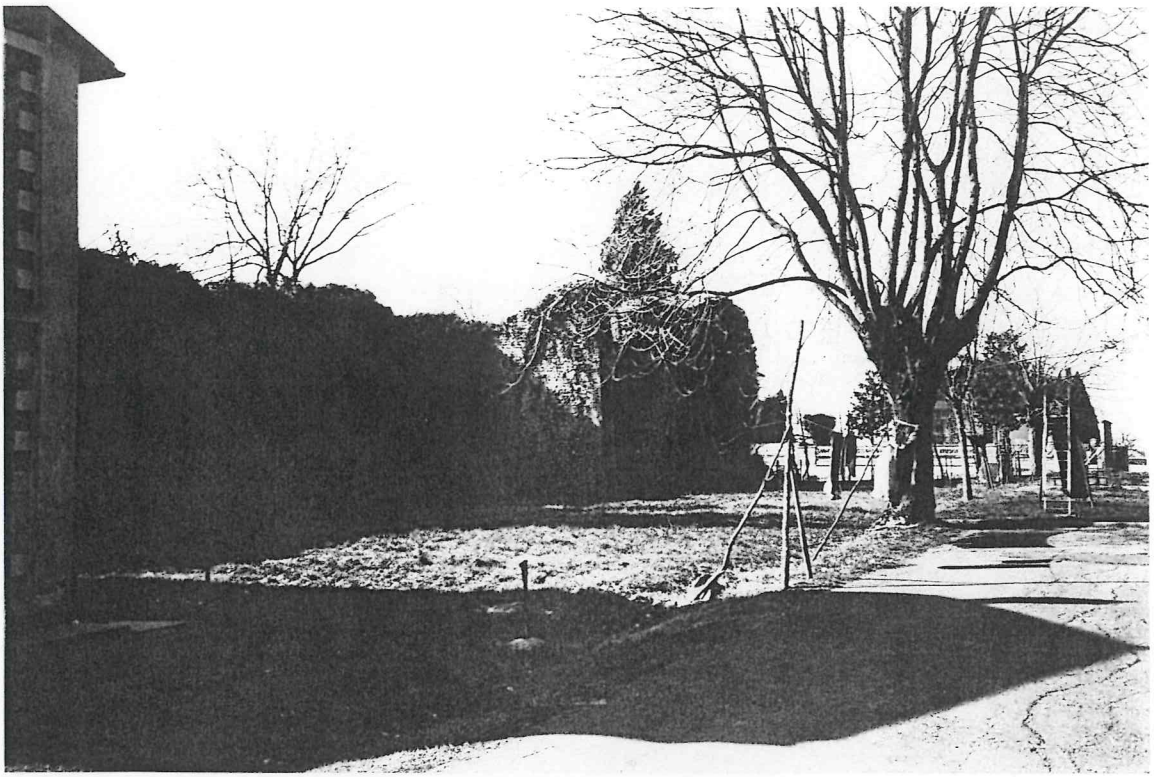

La piazza del Castello in un momento di vita quotidiana all'inizio del secolo; si nota il vecchio lampione in ferro battuto ottocentesco, la trattoria Umberto I° (ora del Castello) ed i portici che «guardano la porta».

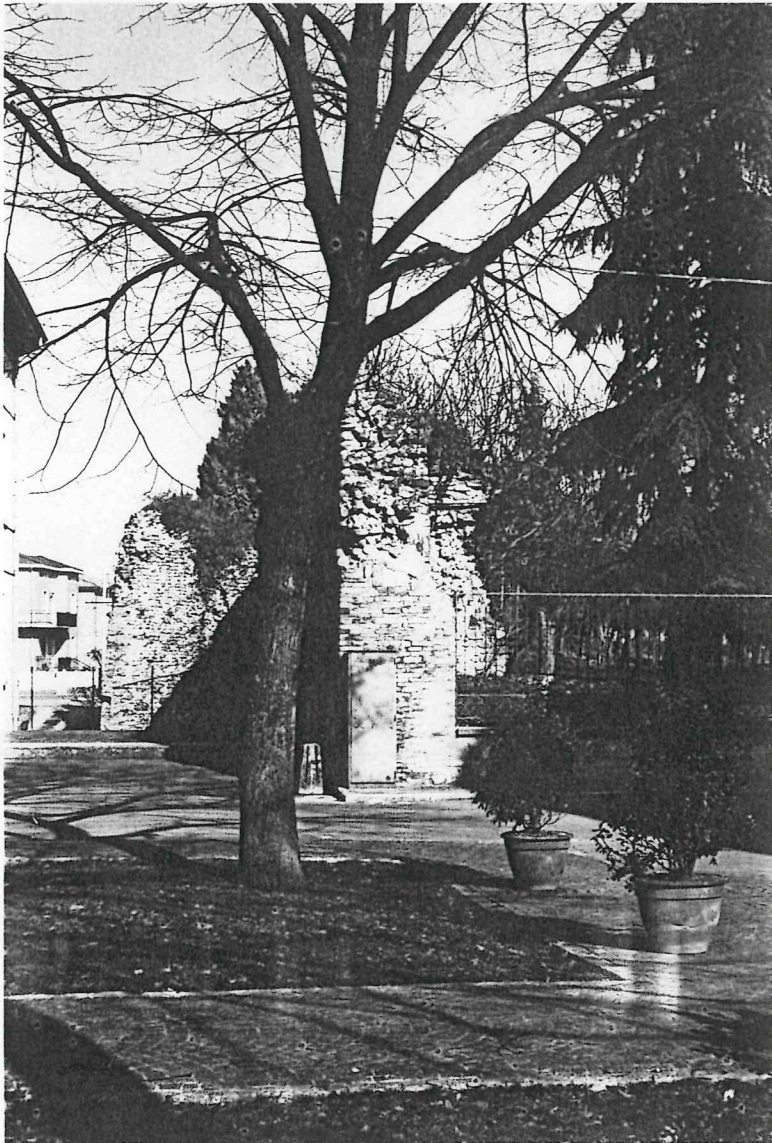

Il Centro del Paese nei primi anni del '900, con il «pôs ed mez» e l'acciottolato delle strade, che si mantenne sino agli anni 1960/1961.
